## REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to show or suggest the self-drilling rock bolt and method of installing the rock bolt comprising means for introducing pressurized expansion fluid including a swiveling device, wherein the swiveling device is arranged to cooperate with the outward surface at the region of the connecting portion during installation so that in an inactive state of the swiveling device the rock bolt is free to move during a rock breaking step and in an active state is able to be tightened against the rock bolt in the expansion step in such a way that a sealed channel for expansion fluid is established between an expansion fluid source and the expansion portion. The closest prior art, Japan 2002-174100 discloses a self-drilling anchor bolt; however, the Japanese reference is silent to the swiveling device which allows the allows the rock bolt to move in an inactive state and which allows tightening against the rock bolt in an expansion step in an active state so as to provide a sealed channel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
